IMPORTED FOOD SPECIALTIES

Green Olives – We stock numerous packs & sizes of various green olives, both pitted and stuffed with pimiento, in addition to sliced. Queens (the larger olives) range in size from 80/90 count to 140/160 count. We also import manzanilla (the smaller olives) which are a 340/360 count. **DID YOU KNOW?:** The count of olives refers not to how many olives are in a gallon, but to the number of olives contained in a kilogram (2.2 lbs) prior to pitting? A gallon of 120/130 count, for example, contains about 285 olives. The higher the count, the smaller the olive, and the more per gallon. All olives are available in quarts, gallons or drums.

Roasted Red Peppers – Whole, sliced, & diced are in stock, packed 12/28 oz, 6/3 kg and 6/10 cans. We import product from Turkey as well as South America, and keep a careful eye on quality. The peppers are a deep red color, are free of seeds, and have the traditional char marks and delicious flavor. These are a great addition to sandwiches, wraps, salads, antipasto, and as a garnish. The most popular is the sliced product which is ready to use out of the can with minimal labor required. Price to your distributor is approximately \$1.40/lb, or \$0.09/oz.

SunDried Tomatoes – Imported from Turkey, both halves and julienne cut are available in 5 lb vacuum packed bags. With a low salt content, nice red color, and great tomato flavor, this product at about \$2.60/lb is a good value and can be used on sandwiches and wraps, as well as with pasta dishes. Call for a sample today!

Maraschino Cherries – Our cherries are a FULL pack gallon, meaning a minimum of 62 oz drained weight, whereas some competitors are significantly less. For example, a 56 oz gallon is 10% less product, which on \$40 equals \$4.00! *Know what you are buying*, as what appears to be a “good deal” may not be one. Additionally, our spec requires no more than 10% of the cherries have the stem broken off, which is favorable compared to industry standards. These are packed in PET plastic jars with an induction seal to prevent leakage prior to opening.

Artichokes – These are available packed in water either as whole hearts, quartered, or pieces (smaller quarters and assorted pieces, often used as an ingredient in dips). Our product is cleaned well, and cut low enough to help prevent undesirable tough leaves. Artichokes can be added to salads or antipasto, used as a pizza topping, or deep fried and served with dip. Imported from both Spain and South America in 6/3 kg cans. We also stock quartered artichokes packed in an oil & vinegar marinade.

Jalapeno Peppers – We import these from a few different sources around the world, searching for competitive pricing and good quality. Sliced product is stocked in 6/10’s & 12/28 oz cans, as well as plastic 4/1 gallon, and we also have diced in 6/10’s. The peppers are medium hot, with a nice crunch and good clean appearance.

Check out our website for a complete product listing, as well as detailed specs on each product. For additional information please contact Scott Leach directly at 800 631 7070 x208 or sleach@ambrosia-foods.com.
