IMPORTED FOOD SPECIALTIES

The imported food environment continues to be challenging, however, it is in times like these that chains need a reliable importer who buys from reputable factories overseas and can bring your chain timely information so that you can make intelligent decisions. This is what Schreiber Foods International can provide. While we cannot control the currency exchange values, the price of oil, or the success or failure of a particular crop, we can bring you information that can help you plan your purchases and menus. We source the world to offer our customers options. Feel free to contact us anytime to discuss your upcoming menu changes and where we forecast costs and supply to be in the near future.

AMBROSIA Lemon Juice – NEW ITEM! - We now stock this item in a 12/32 oz, and is a product of Peru. Packaged in PET plastic bottles, and priced very competitively versus the national brand.

YBARRA Spanish Extra Virgin Olive Oil – Spain is the world leader in olive oil production, and this is one of the leading brands of Spanish Olive Oil. Pronounced “ee-bar-ah”, we will be importing two varieties of this oil: The “red” label Aromatico Seleccion in both a PET plastic bottle and glass bottles, as well as the more robust “blue” label Afrutado Gran Seleccion in glass bottles. 3 liter tins also available. Call today for samples of this truly flavorful and aromatic oil.

Sesame Oil/Tahini Paste – A worldwide shortage of sesame seeds has caused significant increases in the price of both our 10/56 oz Pure Sesame Oil, as well as our 12/16 oz Tahini Paste whose main ingredient is sesame seeds. Supply of these products has not been affected yet, however prices have advanced.

Kalamata Olives – We import both Greek and Turkish product in 6/2 kg kegs, and stock pitted product as well as sliced. The sliced gives better coverage using less product, and can be used in salads, on sandwiches and on pizzas.

Sliced Pepperoncini – This is becoming a popular alternative to using whole pepperoncini, providing the flavor of pepperoncini while using less product. This is sliced across the pepper, yielding rings approximately ¼” - ½” thick. Packed in 4/1 gallon plastic jars.

Basmati/Jasmine Rice – These rices from the Far East have advanced significantly in price as supply for export has dwindled. With a shortage of rice, the producing countries are restricting the amount of product available for export in an effort to hold enough rice for their domestic needs. While we are able to buy rice, prices are historically very high. We import Jasmine Rice from Thailand, and Basmati Rice from Pakistan. Please contact us if you plan to add or increase usage of either of these rices so that we can give you a current market update.

With any questions or comments, or to consult with us on current market conditions for any of our 200 items, please contact Scott Leach at 800-631-7070 X208 or email at sleach@ambrosia-foods.com.
